24.	Summary of the Event (Around 100 words)	<p>The Advancing Financial Research," presented by Harshith Kumar M (MBA in Finance, Associate, Acuity Knowledge Partners), offers a practical introduction to equity research and building financial models using Excel. The session explains that financial modelling involves constructing a structured representation of a company's performance through historical financial data, future assumptions, and formula-driven projections. These models help answer vital business questions such as assessing market expansion, staffing affordability, and business valuation. Equity and Firm research is particularly relevant for careers in investment banking, corporate finance, startups, and private equity.</p> <p>Excel is emphasized as the fundamental tool for financial research, with a focus on developing strong spreadsheet habits, mastering essential shortcuts, and maintaining clear and clean formatting. Clarity and auditability are prioritized through the consistent use of formatting conventions. The masterclass highlights the importance of understanding financial statements, as they form the foundation for robust model-building and accurate forecasting. Interactive elements such as poll questions and scenario-based exercises (e.g., choosing between ₹95 today or ₹100 in a year) encourage attendees to think critically about financial decision-making and the time value of money. Overall, the masterclass provides foundational insights into both the technical and conceptual aspects of financial modelling, preparing participants for key roles across the finance industry.</p>
