What's Technical Communication?

An art of communicating complex technical information in a clear and concise manner to a specific audience.

Examples:

- How to use Google Meet on your mobile?
- How does Signal compare to WhatsApp?
- How to deploy a Virtual Machine to the Cloud?
- How to set up Single sign on?
- How do I build and run my first Docker container?

Examples

Technical Writing

- Single sign-on (SSO) means you do not have to sign in to every application you use. You can sign in once and you are automatically signed in to other applications too with the same credentials.

Academic Writing

Single Sign-On (SSO) protocols enable companies to establish a federated environment in which clients sign in the system once and yet are able to access to services controlled by different companies. The OASIS Security Assertion Markup Language (SAML) 2.0 Web Browser SSO Protocol is an emerging standard in this context.

Creating Writing

Once you step in once, you are embraced everywhere you set foot in.

Overview

Now that we have a good overview of containers and the Docker platform, let's take a look at building our first image. An image includes everything you need to run an application - the code or binary, runtime, dependencies, and any other file system objects required.

To complete this tutorial, you need the following:

- Docker version 12.10 or later. Download Docker [2] to get a "stable" release ("latest").
- Docker running locally. Follow the instructions to download and install Docker.

An IDE or a text editor to edit files, etc.
