Eco & ISR Activity Report

On 20/9/2024, a group of students and faculty members participated in an impactful ISR activity focused on Environmental Sustainability.

Participants were provided with seeds, soil and manure and together we created 100 seed balls which are set to be planted in the near future. The hands-on experience fostered team work while ~~at~~ enhancing our understanding of seed germination and planting techniques. The environment was lively and engaging, making the activity both educational and enjoyable. This initiative not only promotes green practices but also strengthens the bond between faculty and students, encouraging future collaborative efforts in environmental conservation.
