23.	Summary of the Event (Around 100 words)	<p>Department of Computer Applications (BCA), DSCASC organized a Guest Lecture on "Addressing and Subnetting" on 4<sup>th</sup> Jan 2024.</p> <p>IP addresses serve as unique identifiers for devices connected to a network, allowing them to communicate with each other. Subnetting is the process of dividing a larger network into smaller, more manageable sub-networks or subnets. This division helps optimize the use of available IP addresses and enhances network performance and security. Subnetting enables organizations to organize their networks logically, and improving overall network performance.</p> <p>Finally, the session concluded with clearing students doubts.</p>
