Eco & ISR Activity Report

On 20/9/2024, a group of students and faculty members participated in an impactful ISR activity focused on Environmental Sustainability.

Participants were provided with seeds, soil and manure and were instructed to make 100 seed balls, which are to be planted in the near future. The experience allowed the participants to learn seed germination and planting techniques. It also allowed the participants to learn teamwork. The working environment was both educational and engaging.

These initiatives allow the participants to learn and promote green practices but it also strengthens the bond and reduce the gap between Faculty and students.

The initiative inadvertently encourages future collaborative efforts in environmental conservation and preservation.
