22.	Summary of the Event (Minimum 100 words)	<p>An interactive awareness talk was delivered by the students about the need to conserve various elements of nature viz., soil, water, air, trees. In entirety, the planet and its resources are for the present generations to enjoy but also the generation has equal responsibility to protect the planet for the generations to come like our ancestors did for us.</p> <p>The ways in which rapid population growth is aggravating the harm to the world has to seize and we all should move towards sustainable products and solutions. The idea of exploiting the natural endowments for one's own selfish ends would not help, rather a socially conscious behavior from every one of us would definitely make a difference.</p>
