Internal Quality Assurance Cell
Bridge & Remedial cell
Cell Annual Report June 2018-May 2019

Bridge Course helps students to make a successful transition into their new academic programs by providing them with the necessary background knowledge about the topics that will be covered in their new courses. In addition, Bridge Courses can also help students to develop the skills and abilities that they need to succeed in their new academic programs.

Each student's skill or ability is improved by Remedial Teaching. Teachers direct the students through the educational process using different strategies such as more practice or clarification, repeating content, and devoting more time to working on skills. Many students need the additional assistance that remedial programs may provide. Provide guidance in small groups to allow for more individual focus. The objective of the Remedial Teaching Program is to offer learning support to students who are not doing well compared to their peers.
